

# JOURNEY 6 TRIP 1

## Ten Commandment Hopscotch

Draw the hopscotch grid on the pavement or sidewalk using chalk. Write the numbers 1-10 inside the squares. You might also like to write clues to each commandment in the square as shown below. Players will take turns tossing a small marker (like a stone or beanbag) into numbered squares. Hop through the squares until you reach the square where your marker has landed. Recite the commandment for that square. If you get it right, toss your marker again and continue to the end of the grid. If you can't remember the commandment, or if you step on a line or lose your balance, you must return to the beginning of the grid.
